Grade 4 Math: Angles

Angles

1. A _____ is a part of as line that has one endpoint and extends infinitely in one direction.
2. An _____ is made up of two rays having a common endpoint called vertex.
3. A _____ is used to measure an angle
4. Angles are measured in _____
5. Angles are classified according to their measures.
6. _____ has a measure less than 90degrees
7. _____ has a measure of more than 90 degrees but less than 180 degrees
8. _____ has a measure of exactly 90 degrees
9. Zero, straight and reflex angles are called _____
10. _____ measures 180 degrees
11. _____ measures between 180 and 360 degrees
12. _____ measures 0 degrees
13. The two intersecting lines that form right angles are called

    _____

Obtuse angle	protractor	Special angles	Acute angle
Perpendicular angle	Reflex angle	ray	Straight angle
degrees	Zero angle	Right angle	angle

_____
